Quick Actions — File a Report

Report Title & Category

Provide a concise title and choose from Electrical, Water Leakage, Furniture, Wi-Fi, Cleanliness, Hostel, Classroom, Laboratory, Sports Facility, or Other.

Priority

Select Low, Normal, or High to indicate urgency and route responses appropriately.

Location & Description

Choose block/room from the dropdown (e.g., Girls Block 1, Academic Block 2) and add a detailed description before submitting.

Track Tickets & Your Reports

Search tickets or view "Show all" to track status. The portal stores each report in a live database so you can see Open, In Progress, and Resolved states for everything you submit.

Broken Fan

OPEN

Connected to a live Supabase database — tickets and resource updates are verified, tracked, and stored securely across user sessions.

Your Reports

- View recent submissions and current statuses
- Access ticket details, comments, and assigned teams
- Clear and consistent audit trail for follow-up

Seamless Resource Allocation

Book classrooms, auditoriums, and media equipment with real-time conflict detection and automated scheduling to prevent double-bookings and simplify planning.

Northfield College

Good Food Great Friends Best Memories

Browse live menus across Mayuri Canteen, Bistro, Underbelly, AB Dakshin. Order ahead to skip queues and generate pre-order tokens.

Cart shows selected items and total bill. Generate a pre-order token to collect food quickly.

Hostel & Gate Operations

Log Room Maintenance

File electrical, plumbing, carpentry, or Wi-Fi issues for specific hostel block & room with a description and request type.

Register Expected Visitor

Pre-register visitor name, relationship to student, and arrival date to generate gate passes and streamline security checks.

Gate Punch Registry

Real-time safety checks with privacy-limited guard views focused on visitor verification profiles.

Operational Oversight & Notices

The portal supports Broadcast Master urgent notices — publish headlines and messages to the campus notice board. Manage an in-house safety census (open maintenance overhead, active guests) and an operational grievance pipeline showing counts for All Reports, Open, In Progress, and Resolved.

-
- Broadcast urgent notices to all boards
- Monitor unresolved maintenance overhead and active guest counts Track grievance lifecycle from report to resolution

Data & Integration

The system is connected to a live Supabase database — tickets and resource spaces are verified, tracked, and stored securely across user sessions. This ensures auditability, reliable conflict detection for bookings, and persistent user histories for reports and visitor passes.

📌 Theme accent: # 8C98CA used across layouts for emphasis and consistent visual cues.
